

Troubleshooting Guide

1. Application Access & Connectivity Issues

1.1 Unable to Open the Application Portal

Possible Causes

- Network restrictions / firewall blocks
- Incorrect URL
- Browser cache or outdated cookies
- VPN / proxy restrictions
- Temporary server downtime

Resolution Steps

1. Check if you have an active internet connection.
2. Verify the URL (check spelling and protocol: http/https).
3. Try accessing the portal in **Incognito/Private mode**.
4. Clear browser cache + cookies.
5. Disable VPN/Proxy and try again.
6. Try from another browser (Chrome, Edge, Firefox).
7. If still facing issues → **Raise a ticket with a screenshot.**

1.2 Portal Slow, Freezing, or Not Responding

Possible Causes

- High server load
- Backend application downtime
- Heavy browser background processes
- Insufficient RAM on user device

Resolution

- Refresh after 2–3 minutes.
- Try on a different browser.
- Close unused tabs and retry.
- Restart system and reconnect.

- Check system status alerts (if provided).
- Persisting issue → **Raise a ticket.**

1.3 Page Loading Incorrectly / Styling Broken

Possible Causes

- Cached stylesheet/script
- Slow network
- Blocked JavaScript

Fix

- Hard refresh (Ctrl + Shift + R).
- Clear browsing data.
- Ensure JavaScript is enabled.
- Try using a different network (mobile hotspot).

2. Login & Authentication Issues

2.1 Invalid Login Credentials

Possible Causes

- Wrong password
- Typing mistakes
- Wrong email ID
- Account not yet activated
- Account locked after failed attempts

Resolution

- Ensure email ID is correct.
- Use **Forgot Password** to reset login.
- Check **account activation mail** in inbox/spam.
- If locked → Contact support to unlock account.

2.2 OTP or Verification Email Not Received

Possible Causes

- Email provider blocked OTP mail
- Delay in mail delivery

- Wrong phone/email entered
- Network issues on mobile

Resolution

1. Wait 2 minutes (OTP emails may take time).
2. Check **Spam/Junk/Promotions**.
3. Click **Resend OTP**.
4. Ensure mobile network is stable.
5. Check if mailbox is full.
6. If still missing → Raise a ticket with email/phone details.

2.3 Multi-Factor Authentication (MFA) Not Working

Possible Causes

- Authenticator app not synced
- Time mismatch on device
- QR code scanned incorrectly

Fix

- Sync time on mobile device.
- Remove and re-add account in authenticator app.
- Try alternate MFA options (SMS/Email).

3. Form Filling & Submission Issues

3.1 Unable to Submit Application

Possible Causes

- Mandatory fields left blank
- Invalid data format
- File attachment missing
- Session timeout
- Browser autofill causing wrong input

Resolution

- Check red-highlighted required fields.
- Validate formats:
 - Email → username@example.com

- Mobile → 10 digits
- Re-upload required documents.
- Refresh session and try again.
- Disable autofill and retype information.

3.2 “Duplicate Application Detected” Error

Reason

The system found an existing application with the same mobile number or email.

Resolution

- Verify if you submitted an earlier application.
- Use an alternate email/mobile number.
- Raise a ticket if you did not submit previously.

3.3 Application Auto-Logout or Timeout

Possible Causes

- Long inactivity
- Browser security settings

Fix

- Save details frequently.
- Re-login and re-attempt submission.
- Avoid idle time during form filling.

4. Document Upload Issues

4.1 Upload Failed / Unsupported File

Check

- Supported formats: **PDF, JPG, PNG**
- Max size: **10 MB**
- File name does not contain special characters (% , # , &)

Resolution

- Compress file using online tools.
- Convert file to PDF.
- Rename file with simple characters.

- Ensure the full document is visible (no cut borders).

4.2 “Document Blurred / Unreadable”

Resolution

- Re-upload clear photo/scan.
- Ensure good lighting.
- Avoid shadows and reflections.
- Use a scanner app or physical scanner.

4.3 “Upload Timed Out”

Cause

Slow internet or large file.

Fix

- Use a stable network connection.
- Reduce file size.
- Retry after some time.

5. Email, Notification & Communication Issues

5.1 Not Receiving Confirmation Emails

Possible Causes

- SMTP delay
- Email filtered to spam
- Blocked domain

Resolution

- Check Spam/Junk folders.
- Search inbox for the application name.
- Add system email address to **Safe Senders** list.
- Raise a ticket if emails are consistently not delivered.

5.2 System Notifications Not Visible

- Check browser notification permissions.
- Enable pop-ups for the application domain.

6. Page Not Found / Missing Documentation

Possible Causes

- Documentation moved or renamed
- Broken hyperlink
- Access permission issue

Resolution

- Use search bar to find the correct page.
- Use related keywords.
- Contact business team for updated link.
- Raise a ticket if documentation is missing.

7. Application Status Issues

7.1 Application Status Not Updating

Possible Causes

- Backend verification delay
- Incomplete documents
- System sync delay

Fix

- Wait 24 hours for status refresh.
- Ensure all documents are submitted and verified.
- Raise a ticket if no update after 48 hours.

8. Access & Permission Issues

8.1 “Access Denied / Unauthorized Access”

Possible Causes

- Insufficient role permissions
- Incorrect login account
- Access not yet approved

Resolution

- Logout and re-login.
- Check with reporting manager/business team for access eligibility.

- Raise an access request via ITSM tool.

8.2 Unable to View Specific Sections

- Role-based restriction
- Page access disabled

Fix

- Confirm role mapping with support.
- Raise access ticket with details.

9. Browser & System Issues

9.1 Browser Compatibility Issues

Supported Browsers

- ✓ Chrome (latest)
- ✓ Edge
- ✓ Firefox
- ✗ Internet Explorer (Not supported)

Fix

- Switch to a supported browser.
- Update browser to latest version.

9.2 Pop-ups or Downloads Not Working

Resolution

- Enable pop-ups for the site.
- Disable browser security extensions temporarily.

10. Network, VPN & Firewall Issues

10.1 Portal Not Working on Office Network

Possible Causes

- Internal firewall block
- VPN restrictions

Fix

- Try on mobile hotspot.

- Report to IT network team with error screenshot.

10.2 VPN Disconnects During Submission

- Reconnect VPN
- Save progress frequently
- Avoid uploading heavy files on unstable VPN

11. Common Errors & Quick Fixes

Error Message	Meaning	Resolution
500 – Internal Server Error	Backend failure	Refresh, try again after some time
403 – Forbidden	No permission	Request access
404 – Not Found	Page removed	Search or raise ticket
Session Expired	Inactivity	Login again
Validation Error	Wrong input format	Correct highlighted fields

12. When to Raise a Ticket

If after following the troubleshooting steps, any of the below occurs:

- Issue repeats frequently
- Portal not accessible at all
- Login completely blocked
- System errors after multiple retries
- Document repeatedly rejected despite clear uploads
- Status not updating beyond 48 hours
- Missing access permissions

Provide the following when raising a ticket:

- Screenshot of the error
- Timestamp
- Steps performed
- Browser + device details

- Application ID (if applicable)
